Quality and performance

Homeowners who expect quality choose Royal. And for good reason. We deliver what we promise. Timeless beauty. Attractive natural woodgrain finishes. Exceptional long-term performance. These qualities have made Residential solid vinyl siding everyone's favorite choice. It lets you achieve the look you want with a variety of decorative colors and distinctive profiles. Plus, Residential won't flake, dent or peel, so your investment is protected for years to come. Best of all, it's virtually maintenance-free, never needs painting, and features the innovative Windlok 160 system, which enables panels to withstand harsh weather conditions as well as hurricane force winds up to 160 mph.* So if you're looking to bring home quality, bring home Residential.

* In testing, the Residential installation system achieved a test pressure of 66.60 lb/ft². This equates to a wind speed of 160 mph.

Shown: Double 4.5" Traditional in White complemented with White Accessories.
Front Cover: Double 4.5" Designer in Driftwood accented by White Accessories.

Colors for Every Home & Lifestyle

HARVARD SLATE	FLAGSTONE
GRAY	BLUE GRAY
PEBBLE CLAY PREMIUM COLOR	CYPRESS PREMIUM COLOR

Printed colors may vary slightly from actual product. When choosing color, refer to actual product sample. Refer to product directory for profile and color availability.

TESTED TO PERFORM

The key to the Dura Technology™ Process is Royalside™ Compound, a proven blend of the world's finest raw materials. This blend, together with our exclusive Dura™ impact modifiers and premium ingredients, forms the base for a tougher, longer lasting siding.

UV Tested for Color Retention

UV tests ensure your siding provides outstanding resistance to fading and discoloring. This advanced color retention is achieved by combining Luran® S ASA, made by BASF, with our innovative Royalside™ Compound and Dura Technology™ Process.

Cold Tested for Harsh Weather

Royal tests its siding against brittleness at temperatures as low as (14°F (-10°C)), ensuring your siding will maintain its superior durability, rigidity and structural integrity under severe weather conditions.

Impact Tested for Strength

Extensive impact tests are conducted at 73°F (23°C) and 32°F (0°C) to ensure your siding exceeds ASTM standards and can withstand the elements, including hail, under any condition.

Double Lifetime Warranty Fully Transferable

Royal is so confident in the superior quality of this product that it is backed by the most powerful non-prorated warranty in the business. Guaranteed.

We've Got You Covered

- Exclusive Lifetime, Non-Prorated Warranty
- Fully Transferable to Lifetime Non-Prorated Limited Warranty
- Covers Replacement Labor and Materials
- Lifetime Hail Protection Coverage
